Multidisciplinary threat assessment teams create the opportunity to push prevention forward in our organizations. With security-informed HR/LR practices and HR-informed security practices, we can learn from each other to make our workplaces safer and prevent workplace violence.

Building bridges between security and HR/LR can transform our people practices into powerful tools to prevent and mitigate workplace threats. This interactive presentation will focus on ways to strengthen the relationship between security and HR/LR as we navigate old and new challenges together in a changing workplace.

Applying hard data to soft skills, this interactive presentation will demonstrate ways to foster workplace practices that increase engagement and reduce threats in our changing work environment. You'll come away with practical tips you can use today.
